Poststructuralism, Philosophy, Pedagogy - J.D. Marshall 2004-02-29 This book provides an historical and conceptual background to post-structuralism, and in part to post-modernism, for readers entering the discussions on post-structuralism. It does not attempt to be at the cutting edge of these debates or to be advancing research in these areas. It does however look at the educational implications of the ideas discussed. The intention behind this collection was to provide a useful introduction to the key positions of a number of French post-structuralist thinkers who are being increasingly referred to, used as support, and even embraced by theorists in educational discourse. The editor and contributors to this volume are concerned that these thinkers have been misappropriated on occasions. That is why this volume concentrates on the historical and intellectual background of these philosophers. Each of the authors of the chapters in this collection deals with 'their' philosopher in the areas of: brief biographical details; key philosophical ideas; and the applications in, or implications of, their work for education.

Psychoanalysis of Sense - Guillaume Collett 2016-10-26 "Guillaume Collett questions to what extent we can locate Deleuze within the Lacanian School during the late 1960s, prior to Guattari. In so doing, he offers a new, integrated reading of Deleuze's Logic of Sense (1969) by understanding it as a 'psychoanalysis of sense', and gives a more coherent account of Deleuze's conception of philosophical thought. The Psychoanalysis of Sense shows that Deleuze was not simply aware of the Lacanian contribution to philosophy, but actively appropriated various aspects of the work of post-Lacanian Bruno Latour. Collett explains how Deleuze constructed a more singular and metamodern theory of the linguistic structure of the unconscious, granting the empirical body a larger structuring role."
